

JANSSEN COSMETICS

We herewith confirm that the cosmetic products of the JANSSEN COSMETICS **SENSITIVE SKIN** Line are ideally suited as complementary skin care during and after **chemotherapy and radiation therapy**.

Our recommendation is based on the fact that the active substances used

- **do not** contain any irritating substances such as:
 - preservatives or parabens
 - declarable fragrance allergens
 - synthetic colourants
 - PEGs
 - alcohol
 - silicone oil
 - paraffins
 - vaseline
 - microcrystalline wax
 - animal ingredients
 - preservative agents according to cosmetics regulations
- increase the skin moisture,
- strengthen the skin barrier,
- reduce redness and feeling of tension and
- have been tested under dermatological supervision on persons with sensitive skin and thus classified as safe.

This spectrum of activity is of vital importance for the treatment of sensitive skin and also for the complementary care of damaged skin during and after cancer therapy.

Date: 18th of August 2020
